

Thinking About Your Future? Take Advantage of the Growing Demand for Health Care Professionals.

By 2010 there will be 4,200 new job openings in Nursing and Allied Health with starting salaries for nurses averaging \$57,000 or more.*

Connecticut's health care demands are projected to increase 60% in the next 20 years. Great pay, flexible schedules, and continuing education are among the incentives employers may offer. The Associate Degree in Nursing program offered at five Connecticut Community Colleges will prepare you for the national licensure exam that certifies registered nurses. Or you can choose from over 20 allied health programs including Surgical Technology, Respiratory Care, Nuclear Medicine Technology, Radiography, Mental Health, Medical Assisting, Diagnostic Medical Sonography, Physical Therapist Assistant, Dental Hygienist, and more. These professionals are a key part of Connecticut's health care industry.

Need to sharpen your skills first? Then register for the new Health Career Pathways Certificate Program.** Discover your pathway to degrees and higher-wage jobs in these areas: Certified Nurse Aide, EMT, Patient Care, Phlebotomy, Pharmacy Technician, Medical Billing & Coding, and Dental Assisting.
