Associate degree graduates can expect to earn over \$600,000 more over a lifetime than a high school graduate. Over the course of his/her working career, the average student's lifetime earnings will increase \$8.10 for every dollar invested in their college education, according to a 2008 economic impact study by EMSI Inc. The study reported that the "Connecticut economy receives roughly \$5 billion in income each year due to the colleges and their students."

Education That Works For a Lifetime
