

RWRXE02 – Pell Grant/Perkins Data Report

This report selects students who are Pell Grant recipients and are also enrolled in an “occupational” certificate or degree program at the college. Pell Grant recipients are those students receiving a disbursement of federal Pell Grant dollars in the current aid year. Occupational programs are designated by CIP codes and, in general, are not liberal arts/general studies programs. This report is a “periodic” report in that most users will generate this data annually for submission to the System Office and the Connecticut State Department of Education. This report is included in both the “Professional” and “Institutional Research” security classes. This report can be generated on both a college and system level.

Report Parameters are limited:

01 Aid Year – designate aid year choice (e.g.0102)

02 Detail List – indicate ‘N’ or ‘Y’ if you want a detailed list of selected students

Report Format – College account
